Location: Cairo, Egypt

ABOUT ME

I specialize in tender preparation, quality assurance, and business development, backed by a technical background in web development and IT solutions, specifically supporting technology-sector tenders in Saudi Arabia. At Brains Valley, I have contributed to the preparation and review of over 200 tenders, combining technical expertise with strong skills in analyzing tender documents, requirement matching, compliance review, quality assurance, gap analysis, and the creation of competitive proposals. I am experienced in ensuring that proposals are complete, consistent, and fully aligned with tender requirements, whether working remotely or on-site. Additionally, I am highly skilled in developing responsive, user-friendly websites and writing clean, maintainable code, with a focus on performance, security, usability, and delivering effective technical solutions that meet client needs.

Skills Section:

Core Competencies:

- Technical Proposal Writing & Editing
- RFP / RFQ & Tender Analysis
- Compliance Matrix & Requirement Traceability
- Proposal Quality Assurance (QA) & Audit
- Bid / No-Bid Assessment
- IT Pre-Sales & Solution Design
- Saudi Government Tenders & Procurement Law
- Bid & Submission Management
- Cross-Functional Collaboration & Stakeholder Management

Platforms & Tools:

- Etimad Platform Government Procurement Portals
- MS Office Suite (Advanced Word, Excel, PowerPoint, Visio)
- Document Version Control Systems

Technical Domain Knowledge:

- IT Infrastructure & Networking
- Cybersecurity & Network Security
- Cloud Solutions & Managed Services
- Digital Transformation & Enterprise Technology Solutions
- SLAs, KPIs, & Project Governance Principles

EXPERIENCE

2026 January / Present — **Tender Proposal Writer | Tender QA | Business Development**

Brains Valley Co

- RFP/RFQ Analysis & Tender Evaluation:
  - Analyzed complex RFPs, RFQs, tenders, and TORs for government and private sector projects in Saudi Arabia, identifying mandatory requirements, evaluation criteria, and technical weights.
  - Conducted technical Bid/No-Bid assessments in coordination with sales and delivery teams to evaluate risks, resource availability, and feasibility.
- Technical Proposal Development:
  - Authored comprehensive and persuasive technical proposals, including executive summaries, technical methodologies, scopes of work, solution architectures, implementation plans, SLAs, and project governance models.
  - Developed proposal content across IT Infrastructure, Networking, Cybersecurity, Cloud Solutions, and Digital Transformation domains.
- Compliance & Quality Assurance (QA):
  - Developed and maintained detailed Compliance Matrices, ensuring strict traceability between tender requirements, proposal responses, and supporting evidence.
  - Performed rigorous quality reviews on proposals to ensure consistency across scopes, timelines, resources, and technical specifications, eliminating contradictions and formatting errors.
- Tender & Submission Management:
  - Prepared and organized complete technical submission packages (CVs, company profiles, previous experiences, methodologies, and forms) with strict document version control.
  - Managed and executed proposal submissions via the Etimad Platform and other procurement portals in compliance with Saudi government procurement regulations.

Oct 2025 / 2026 January — **Full-Stack Web Developer & Technical SEO Lead**

brandsolutions

Develop full websites using WordPress, Salla, Zid, and Next.js with integrated SEO from inception.Lead on-page SEO structure, meta templating, Core Web Vitals optimization, and resolve crawl/indexing issues.

2025/5 2025/11 / remote — **WordPress Developer**

Cool Edu

Redesigned and optimized an educational WordPress site over 3 months. Improved site structure, database performance, asset compression, and overall SEO.

Oct 2024 – Oct 2025 — **Business Developer, Web Developer & ERP Implementer**

Al Yosr

Redesigned and optimized an educational WordPress site over 3 months. Improved site structure, database performance, asset compression, and overall SEO.

Feb 2021– Oct 2021 — **WordPress Developer**

Web Solutions

Developed and maintained WordPress websites, handling updates, fixes, and ongoing maintenance.

EDUCATION

2019 - 2023
Zoser University

Bachelor's Degree in Management Information Systems
The fields of computer engineering include: data structures and algorithms, computer graphics, database systems, programming languages and compilers, operating systems, software engineering, artificial intelligence and expert systems, modeling and simulation, decision support systems, computer networks, neural networks, pattern recognition, digital image processing, information systems design, computer and network security, and industrial control and instrumentation. This specialization focuses on integrating business processes with IT solutions through systems analysis, databases, software applications, and data-driven decision support to improve organizational efficiency and performance.

Meta (via Coursera)

Meta Back-End Developer Professional Certificate
Completed an 8-course professional program covering server-side development, database management, and API architecture. Technical Stack: Python, Django, MySQL, Git/GitHub, and Linux. Key Skills: Developed RESTful APIs, implemented User Authentication, and managed relational databases using SQL. Capstone Project: Engineered a full-featured backend system for a "Little Lemon" restaurant application, including booking and menu APIs.

Meta (via Coursera)

Meta Front-End Developer Professional Certificate

Acquired mastery in building responsive, interactive user interfaces using modern web technologies. Technical Stack: React.js, JavaScript (ES6+), HTML5, CSS3, and Figma. Key Skills: Developed Single Page Applications (SPAs), implemented UI/UX principles, and performed unit testing with Jest. Capstone Project: Built a responsive React-based web application with dynamic components and integrated booking forms.

Issued by: NIIT

NIIT Front-End Development Specialist (using React
Specialized in high-performance front-end engineering with a focus on component-based architecture. Core Competencies: Advanced React hooks, State Management, and asynchronous data fetching. Focus: Applied industry best practices for writing clean,

scalable,and maintainablefront-endcode forenterprise-level applications.

Meta (via Coursera)

Meta UX/UI Design Professional Certificate

Trained in the end-to-end design process, from initial user research to high-fidelity prototyping. Tools: Figma, Adobe XD. Methodology: User Research, Wireframing, Information Architecture, and Usability Testing. Portfolio Work: Designed a cross-platform mobile app and website, focusing on accessibility (WCAG) and user-centered design.

(ITI / Mahara-Tech)

Mahara-Tech: Developing Web Applications using MERN Stack
Advanced Full-Stack program focused on building scalable web applications using the JavaScript ecosystem. Technical Stack: MongoDB, Express.js, React.js, and Node.js. Key Skills: Architected NoSQL database schemas, developed secure RESTful APIs, and integrated front-end components with back-end logic. Portfolio Work: Developed an end-to-end MERN application, implementing JWT authentication, state management, and real-time data handling.

SKILLS

- HTML5, CSS3
- **Node.js**
- **SQL**
- **Next.js**
- TypeScript
- Git/GitHub
- Namecheap
- Notion
- JavaScript, ES6
- **PHP**
- sql server
- **vueJS**
- Express.js
- **Figma**
